IN THE CLAIMS:

Please cancel claims 2-71 and add new claims 72- 99.

72. A currency counting and discrimination device for receiving a stack of currency bills, rapidly counting and discriminating the bills in the stack, and then re-stacking the bills comprising:

an input receptacle for receiving a stack of currency bills to be discriminated;

a discriminating unit for discriminating the denomination of the currency bills;

an output receptacle for receiving the currency bills after being discriminated by the discriminating unit;

a transport mechanism for transporting the currency bills, one at a time, from the input receptacle past a sensor of said discriminating unit and to the output receptacle;

one or more counters keeping track of the value of bills discriminated;

means for suspending the operation of the transport mechanism when the discriminating unit is unable to identify the denomination of a bill; and

a keypad capable for receiving input from an operator of the device, the keypad enabling, upon suspension of the operation of the device, the operator to either (a) indicate the value of a bill whose denomination is not determined by the discriminating unit and restart
